# The situation: warmongers in power

But the 9/11 deceivers were deceived – and lured into servitude.

“And no wonder, for Satan himself masquerades as an angel of light.”

**2 Corinthians 11:14**

## The way out

The key element of the oligarchs' mind game is fear – or angst.

On the spiritual side you will always win, dropping the angst:

- trust in your spiritual self

There is just one way out: the continuous **and personal** search for truth, justice and peace, which is the only option.

For all of us.

To disarm the devil – and not to serve him.

How did they fool us, the 9/11-experts, the paid collaborators?

How is it that our institutions continue to fail us?

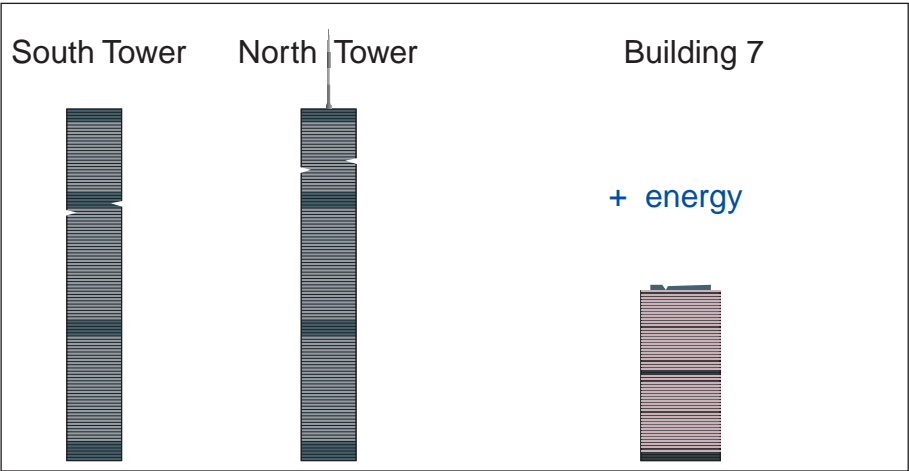

Denial and deception made us believe:

- that we were shown all of the physical 9/11-evidence  
... when so much remains hidden from the public eyes
- that we were told the truth about modern nuclear weapons  
... when they explain us the technology from 1945 – or fiction
- that our modern country is governed by its legal civic institutions  
... when the control of money resides in the hand of private banks

# 1 Introduction

## A trip to London

On April 4th 2017, I traveled to the UK to give a presentation to the 9/11Keepertalking Group at the Diorama Arts Centre in Central London.

Although the subject was a fairly sinister one, it was not my intention to discourage the public: I wanted to deliver a message of hope.

## The gift of 9/11

Our knowledge has become dangerous to the power elite.

We know that wars have been started on basis of the 9/11-deception.

We know that a future civil war in Europe is currently in the making, when the artificial migrant crisis spins out of 'control'.

The scenario of a collapsing dollar, the implosion of the US and the simultaneous creation of the 'North American Union' is ready to unfold.

This is the gift of 9/11: to see behind the curtain and stop the crimes.

## 2 The power of simplicity

The two ruling parameters for any physical system are:

- energy
- momentum

### The 9/11-energy equation

Many organizations have observed that a plane and its fuel load can't be the real cause of a building's extremely powerful eruption.

Most of them come to the conclusion that only pre-planted explosives inside the structure could account for the additional energy.

Inevitably, they start talking about floor-by-floor detonations, destroying the building from top downwards.

Source (photo): <http://911research.wtc7.net/wtc/evidence/photos/wtc1exp10.html>

## The 9/11-momentum and material ejection

However, pre-planted explosives in separate floors can produce only:

- circular shockwaves out of the corresponding floor

As these circular shockwaves cannot change direction after the explosion, they will NEVER form a uniform fountain.

---

**Key question: what can produce such a uniform fountain?**

ONE energy center DEEPLY underground can do this.

This is dictated by the law of conservation of momentum.

---

**Destruction by a synchronous floor-by-floor implosion of the structure**

... but suddenly the conservation of momentum is violated !

– conservation of the momentum violated, formation of a fountain points to ONE energy center DEEPLY underground

### 3 Building 7 – energy evaluation

#### The hot chambers in the rockbed

Building 7 was the third skyscraper which collapsed and turned to dust on 9/11, although it was not hit by an airplane.

Infrared images taken in October 2001 still showed high temperatures from scorching hot steel in the foundation of all three buildings.

What kind of explosive could have stored so much energy in the rock?

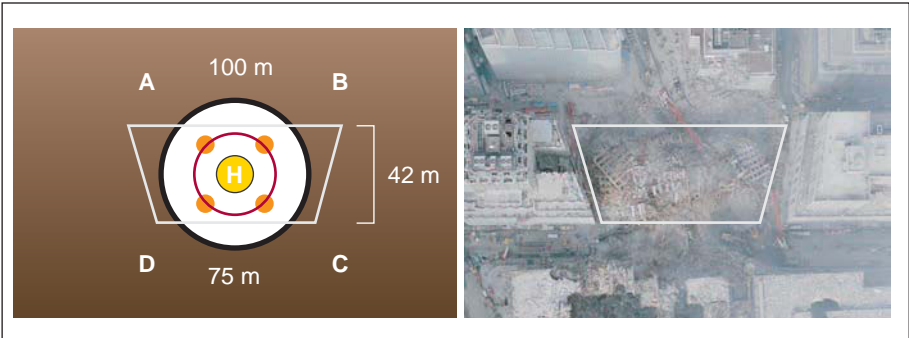

Source: [http://911research.wtc7.net/papers/dreger/GroundZeroHeat2008\\_07\\_10.pdf](http://911research.wtc7.net/papers/dreger/GroundZeroHeat2008_07_10.pdf)

## Energy is measured in joules

When a 1kt nuclear bomb is being detonated it transfers its nuclear energy of 4.184 terajoules into [mostly] thermal energy.

How many Joules are needed to heat up the rock below Building 7?

With a surface of 3,750 m<sup>2</sup>, a cooling time of 4 months and an [estimated] mean start temperature of 300 °C the entire amount stored energy is well within the terajoule-range:  $\sim 10^{12}$  Joule.

Source (photo): <http://www.noaanews.noaa.gov/wtc/images/wtc-photo.jpg>

## The cooking plate analogon

A typical cooking plate [0.02 m<sup>2</sup>] with 2,000 W reaches its temperature within 20 seconds, thus storing: 2,000 W · 20 s = 40 kJ.

Source: <https://en.wikipedia.org/wiki/Energy>

## 4 Building 7 – the mushroom cloud

Although the free fall collapse of Building 7 has been thoroughly analyzed and discussed, crucial evidence was blocked from view.

Source @06:04: <https://www.youtube.com/watch?v=Ujps2oCA-nU>

The pyroclastic flow of the WTC 7 dust and the hot, violently rising mushroom cloud were never reported or analyzed by "the experts".

Source @12:33: <http://www.youtube.com/watch?v=JnLcUxV1dPo>

## Vortex formation

The central mushroom cloud rising up from the foundation of Building 7 developed a vortex (tubular form of water vapor).

Source @13:10: <http://www.youtube.com/watch?v=JnLcUxV1dPo>

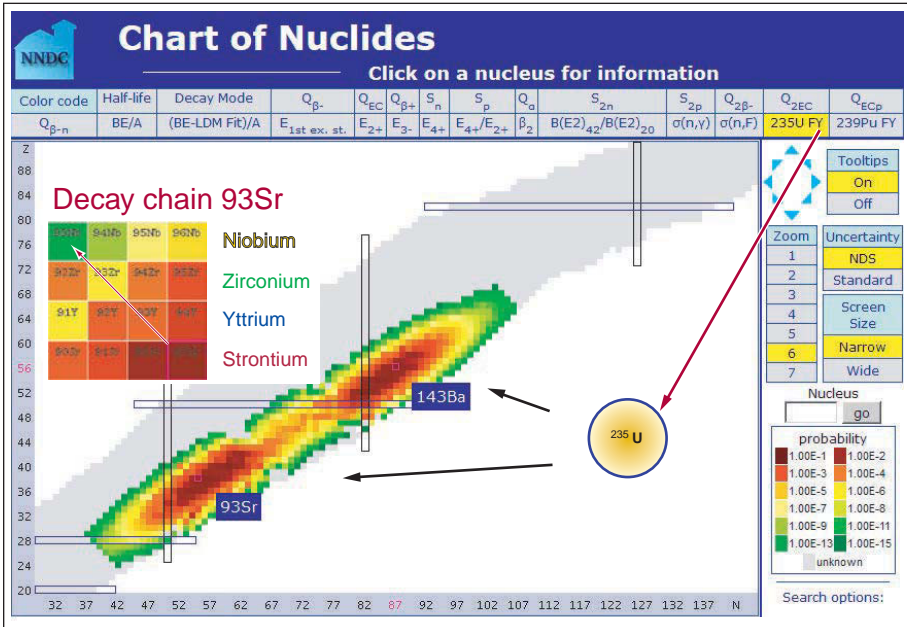

A vortex can often be observed during a nuclear weapon test.

# 5 The truth behind the 'Dirty Bomb tale'

During fission uranium-235 will split into a variety of radioactive elements. The decay chain of these elements is well known.

Source: <http://www.nndc.bnl.gov/chart/reCenter.jsp?z=26&n=30>

The presence of these decay elements was confirmed in the USGS dust sample analysis, however without indicating their radioactivity.

## The ring of protection

Radioactivity in the subsoil cannot be controlled. However, it is possible to control the flow of information and stop it spreading.

After 9/11 the "ring of protection" was implemented: a tightly knit net with over 4,000 people ensured that no "false alarms" were reported.

# 9 The nuclear weapon

It is unlikely that a **first generation** nuclear weapon was used on 9/11, as its efficiency is only 2%, the fallout would have been enormous.

It is also unlikely that a **second generation** nuclear weapon was used, as a simple fission–fusion stage would have created strong neutron radiation and an extremely powerful shockwave ("Khalezov-problem").

## X-ray slow fusion shape charge

However, a **third generation** nuclear weapon type uses:

- artificial sources of neutron radiation, minimizing critical mass / fallout
- strong neutron reflectors, thus further minimizing critical mass
- strong neutron absorbers, preventing neutron activation [MRR]
- shape charge for influencing the direction of the energy [DEW]
- strong X-ray emission by neutron scattering elements
- nuclear fizzle / slow fusion for a long burn (underground)
- neutron collimator tunnel (if the charge is buried underground)

Source [modified]: <https://arxiv.org/pdf/physics/0510071>

- These characteristics make the third generation nuclear weapon the prime suspect for being used on 9/11.

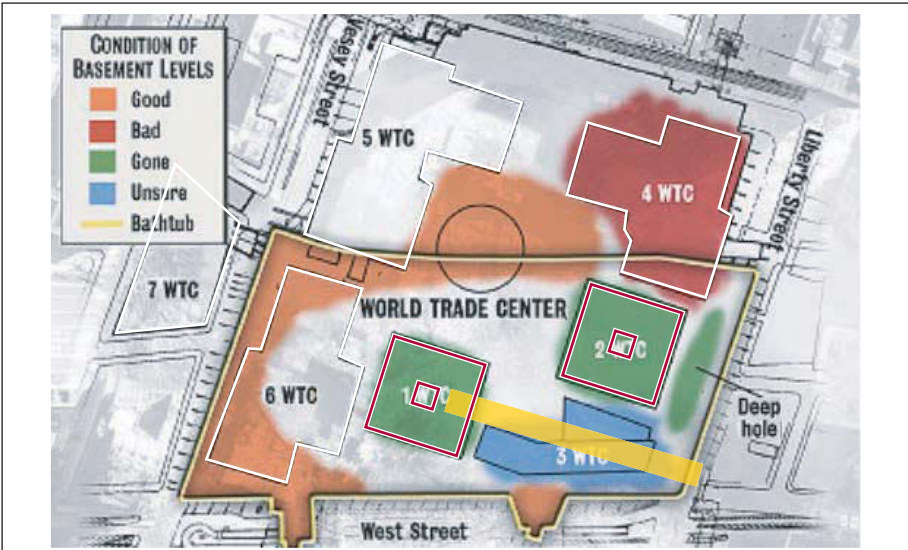

## NOTE

Fission-free **fourth generation** nuclear weapons do exist only on a laboratory scale (anti-matter, pure directed nuclear plasma, etc.).

# 13 The physical model of destruction

The Twin Towers were constructed as airtight, closed buildings.

Their destruction was achieved by evaporating the inner steel core, using a superhot nuclear plasmatic needle and x-ray radiation.

## 13.1 The need for the nuclear chimney

To allow the nuclear plasma to shoot through the building and to evaporate the inner steel core two factors must be fulfilled:

- the building must be opened on top (for pressure equalization)
- the elevator shafts must be connected, forming one big chimney

1. Detonations in the lobby / parking level
2. Detonation of the mezzanines

3. Elevator shafts are now connected, connection to the nuclear device exists

## 13.2 Creating the nuclear chimney

The nuclear chimney was created:

- by opening the building on top [by airplanes and explosives]
- by explosions in the sub-basement, leading to the device
- by targeted blasts at the floors to connect the elevator shafts

Seven seconds **before the plane hit the North Tower**, a powerful explosion inside the freight elevator shafts destroyed the lobby.

### 13.3 Weakening of the structure [pre-collapse]

The weakening of the structure was achieved by:

- detonating cutter-charges at the core steel columns
- using the incendiary thermite for creating brief bursts of high temperature in small areas (partial melt out)

Little fountains of liquid metal, similar to discharges or little detonations were ejected from the facade.

### 13.4 Ready for ignition at 50 m below entrance level

Chosen geometry for this case study (depth of burial in rock 25 m):

- 1 kt yield as primary shockwave pattern
- 26 kt yield additional slow fusion x-ray emission directed energy

## 13.5 Ignition: x-ray / neutron flash in the earth

### Primary fission charge

The primary uranium-235 fission charge detonates by:

- suddenly surpassing the threshold of critical neutron flux

The result is extreme heat, pressure, x-ray and other radiation

### Reflection

Although the energy flux in a third generation nuclear weapon cannot be fully controlled, it is possible to choose a preferred direction of the x-ray / neutron flash by using reflectors.

Source: [https://en.wikipedia.org/wiki/Solid\\_angle](https://en.wikipedia.org/wiki/Solid_angle)

### Secondary fusion charge

The duration of a nuclear fusion is:

- in an atmospheric H-bomb: one millionth of a second
- in the planned ITER fusion reactor: sixty seconds
- in the sun: 4.5 billion years

To achieve a long burn of the [one or several] fusion fuel capsules, a very symmetrical configuration must be ensured, to avoid hydrodynamic instabilities during compression.

# 13.6 Long fusion burn [= nuclear fizzle] and x-ray emission

A nuclear fusion can continue indefinitely, provided that there is:

- sufficient high temperature (about 1,000,000 °K)
- sufficient high pressure (about 1,000,000 bar)
- sufficient concentration of nuclear fuel

It is an **open question** how this containment was achieved in the hard rock for about 5 seconds on 9/11, resulting in extremely powerful x-ray emission upwards – and evaporating the towers' steel core.

### 13.8 Neutron collimator

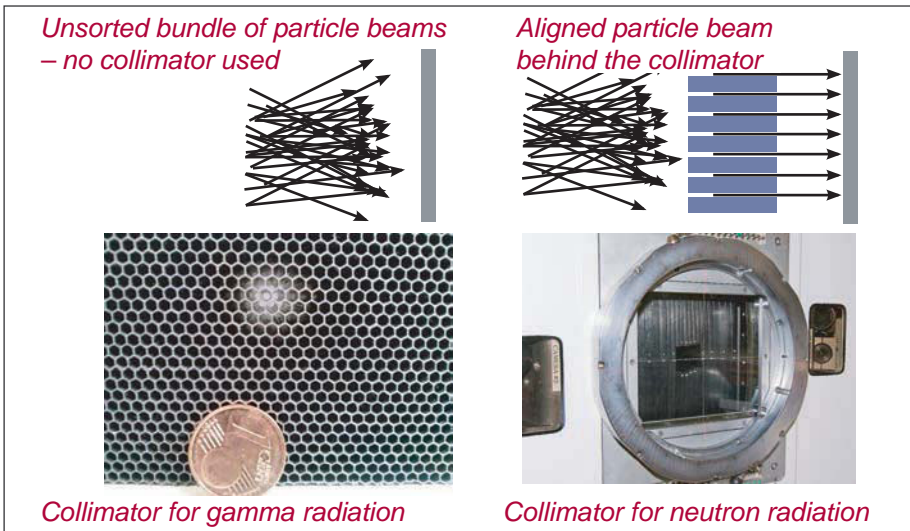

Neutron collimators were tested during nuclear weapon tests:

- a collimator acts like an aperture plate, filtering transverse rays
- the result is a directed energy beam in the desired direction
- a tunnel inside the rock forms an excellent collimator [on 9/11]

# 14 Delayed Electro-Magnetic Pulse EMP

## The expected EMP was 12 seconds late

Normally an EMP pulse is released at the same time when the nuclear device is detonated.

However, due to the Towers' outer steel structure, they represented a Faraday cage: electromagnetic radiation was trapped inside.

# 15 Neutron absorption and isotopes

**Neutron absorption = higher atomic weight = new isotope**

- if the new isotope is radioactive, we speak of 'neutron activation'
- if the new isotope is stable we speak of 'non-activation'

Source: <https://en.wikipedia.org/wiki/Nucleon>

## Elements which are susceptible to neutron activation

Many elements are stable in just one isotope configuration. This is the case for iodine-127 and beryllium-9, for example.

Source: <http://www.nndc.bnl.gov/chart/reCenter.jsp?z=53&n=74>

## Elements which resist neutron activation

Iron-56 for example will easily absorb two neutrons, remaining stable. In this case a Geiger counter is useless for proving a nuclear process.

# 17 Radiation shockwaves: from iron to dust

## Shockwave reflection

Source [modified]: <https://arxiv.org/pdf/physics/0510071>

### NOTE

The mechanical shockwave passes the system without being bent.

### Mechanism

1. circular neutron radiation shockwave hits Beryllium-9 reflector (I)
2. some of the neutron radiation is reflected upwards 
3. circular shockwave thus changes to kidney-shaped shockwave
4. neutrons enter X-plug (III), being scattered and/or absorbed
5. the neutrons' energy is partly re-radiated as powerful x-ray
6. remaining neutron radiation and x-ray pass the collimator tunnel (IV)
7. the powerful and focused energy beam enters the buildings's core
8. neutron radiation which does not leave the X-plug is absorbed by the Boron-10 housing, thus preventing neutron activation of the environment (II)

Boron-10 changes after neutron absorption to stable isotope boron-11.

# 18 Steam explosions: from concrete to dust

## From concrete to dust

The water inside the concrete crystal absorbs the radiation energy like in a microwave oven:

- it suddenly turns to overheated steam and rips the crystal apart

Radiation hits water in a crystal

The water itself acts as a micro-explosive when being hit

Solid concrete walls turn as brittle as a sandcastle dried up in the sun

-> destruction by steam explosion

The diagram illustrates a crystal lattice structure with water molecules (red and white spheres) embedded within it. Red wavy lines representing radiation are shown hitting the water molecules. Yellow boxes highlight the interaction points. The text explains that this process turns the water into a micro-explosive, making the concrete brittle.

Huge blocks of concrete were thrown out of the building, rotating and getting smaller, dissolving into dust.

# 19 Intact paper

## Energy absorption

Iron / concrete have a high absorbance:

- the absorbed energy destroys the molecular bonds

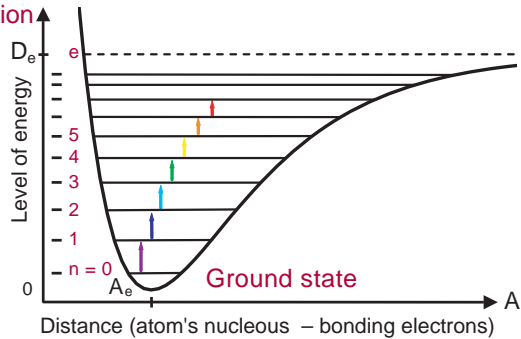

Light materials such as paper have a low absorbance:

- the energy does not suffice to break the molecular bond

## 20 Killing our own

This was the title of a book describing 'The Disaster of America's Experience with Atomic Radiation', published in 1982.

It details the crimes of exposing approximately 300,000 soldiers and civilians to radiation effects between 1945 and 1960.

In the preface of that book there is a quote of Albert Einstein, made in 1947:

We scientists recognize our inescapable responsibility to carry to our fellow citizens an understanding of the simple facts of atomic energy and its implications for society.

In this lies our only security and our only hope – we believe that an informed citizenry will act for life and not death.

Today, the citizens are not informed.

We are disinformed.

And the scientists do not meet their responsibility – by design or by inaction – to warn of the abuse, in which we have engaged collectively.

The physical effects of 9/11 can be explained easily, easily and completely.

The radioactive isotopes in the dust samples and below the Memorial Pools hold the answer.

The stable iron isotopes 57 and 58 hold the answer.

The suspected uranium isotope 235 – needed for the fission bomb – holds the answer.

More than fifteen years have passed, and when it comes to 9/11 all institutions have failed us, and continue to fail us.

The question is: why?

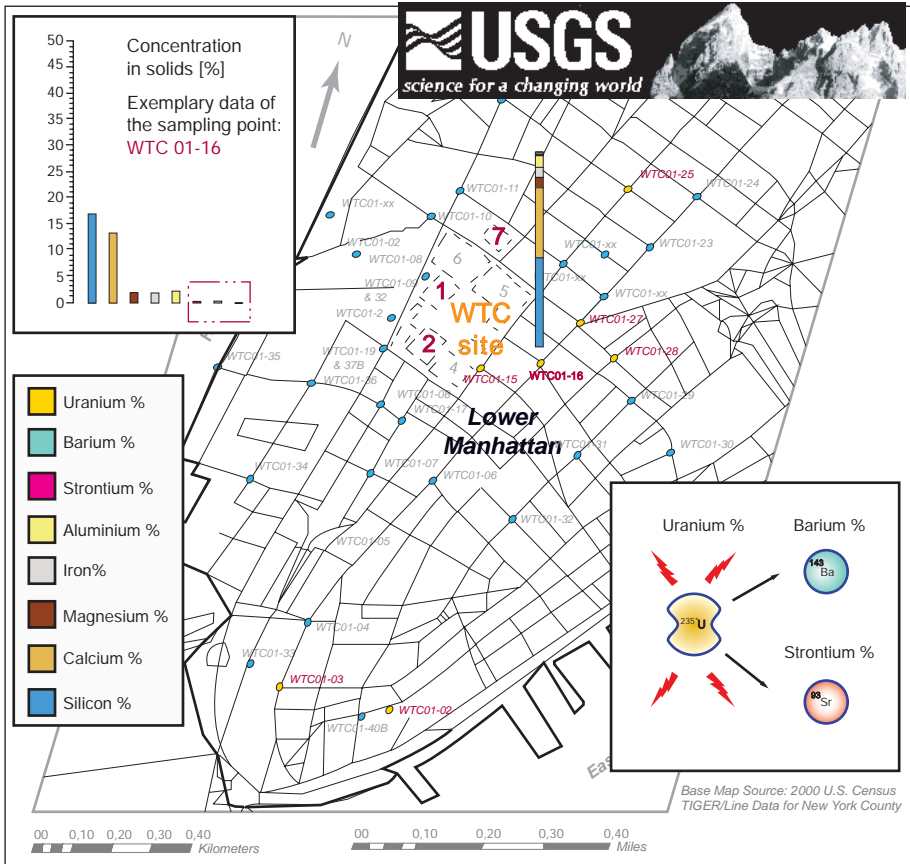

When were we given away? What, if the crime never stopped?

What, if the crime started long ago and is rooted in our history?

# 21 Radioactive dust samples

The United States Geological Survey USGS collected dust samples from over 30 places in Manhattan:

- decay elements from the uranium fission process were found

- thorium (which is the alpha-decay product from uranium)

Radioactivity damages the iron crystal structure and allows oxygen to enter deep into metallic objects:

# 23 Radiation cancers

## Thyroid cancers: a proof of radioactive iodine

Especially when radioactivity and toxic fumes are both involved it is not possible to track down the cause of cancer individually.

- however, one chemical element stands out as a rule: iodine

Source: <http://www.nndc.bnl.gov/chart/reCenter.jsp?z=53&n=74>

Only iodine-127 is safe, as only iodine-127 is stable:

- but ALL iodine isotopes will be absorbed by your thyroid

There is a clear correlation between the 9/11 thyroid cancer cases and the number of 9/11 rescue workers on site.

## Cancer waves

Due to 9/11 about:

- 3,000 people died instantly in the towers
- 2,000 people already died of cancer [2017]
- 5,400 people are currently sick with cancer [2017]
- 72,000 people need medical care

## 24 The devil's trap for the Mossad

On September 11, 2001, at about 10 a.m., former Israeli prime Minister Ehud Barak was coincidentally in the BBC in London:

- his words started the "war on terror" as we know it today

Source: <https://www.youtube.com/watch?v=GAueLjdKh1s>

“If it is a kind of Bin Laden organization [which is behind it]...”

“I believe [that] this is the time to deploy a globally concerted effort led by the United States [...] against all sources of terror.”

### Control over US institutions

On every level and in decisive positions we can identify agents who were working against the interests of the United States, controlling or influencing:

- the White House
- the Pentagon
- the military information systems
- the justice system
- the WTC complex
- the National Institute of Standards and Technology (NIST)
- the media
- the finances

## "We are not your problem" (Mossad agents on 9/11)

On 9/11 five men were spotted shortly after 8:46 a.m., taking pictures of the towers and celebrating the first plane's impact.

- In the afternoon the group was arrested at gunpoint by Officer Scott DeCarlo and Sergeant Dennis Rivelli

The five turned out to be Israeli and were released by Michael Chertoff.

"We are Israeli. We are not your problem. Your problems are our problems. **The Palestinians are the problem.**"

**Sivan Kurzberg**

"I was serving in a special unit in [...]. And it's not a big secret or something like that. But I think that I have to keep [that] to myself, as [I am] loyal to my country."

**Paul Kurzberg**

"When you hear their story, [is that] they want to believe [it], its insane; o.k – maybe I'm a spy."

**Yaron Schmucl**

"And at that point we were taken for another round of questioning. This time related to us allegedly being members of Mossad."

**Oded Ellner**

"The fact of the matter is, we are coming from a country that experiences terror daily. Our purpose was to document the event."

"US law officials, policemen and jailers arrested [us] illegally, for a long and protracted period, and violated [our] human rights..."

## Control over the WTC complex

- Larry Silverstein leased the WTC only a few weeks before the attacks  
He immediately took out high insurances against terror attacks involving airplanes.  
Received payout was 4,55 billion US \$

- Jules Kroll / Kroll Associates was responsible for the WTC building security  
  
He was the owner of the security firm Kroll Associates

- Lewis Eisenberg arranged the lease contract of the WTC complex with Silverstein  
He is a member of the 'Jewish Anti Defamation League' (ADL) and the 'United Jewish Appeal'

- in May 2001, Frank Lowy's company 'Westfield America', rented retail areas on the WTC basement floor for 127 million US \$ – with a contract term of 99 years

## The devil's trap: is Israel really needed for the New World Order?

In the NWO agenda Israel only has to fulfill a function.

It was founded with collaboration of – or by request of – the Rothschild Banking Group

Source: <http://humansarefree.com/2013/11/complete-list-of-banks-ownedcontrolled.html>

The promise of a "Greater Israel" seems to lead systematically to the destruction of the US and Israel – is this all part of the plan?

So, should we understand Henry Kissinger's words differently? Kissinger stated according to the newspaper 'Israel Hayom':

“In 10 years, there will be no more Israel”

Source: [http://www.israelhayom.com/site/newsletter\\_article.php?id=5907](http://www.israelhayom.com/site/newsletter_article.php?id=5907)

Too slowly we start to catch the magnitude of the lie, the diabolic trap designed for Israel, designed as it seems by the devil himself.

Who after all is pulling the strings, in which the Mossad got so terribly tangled up – putting the Jewish people in extreme danger?

# 25 Secret Societies

A secret society is nothing more but a tool for power.

- an instrument to control an institution without the institution knowing about it

Structure of Information inside a virus / inside the pyramid of power

Source: [https://de.wikipedia.org/wiki/Bakteriophage\\_Lambda](https://de.wikipedia.org/wiki/Bakteriophage_Lambda)

The principle how a secret society corrupts a nation is:

- incredibly cunning
- incredibly advanced
- incredibly old

It is a copy from nature itself: bound to destruction by distorting information inside an organic structure:

- but little does a virus know about the lethal and self-destructive information it carries inside itself – people on top do

## The principle of control

“A crime chains people more effectively than virtue.”

To make a secret society work, people within the structure must be completely silenced, when they suddenly realize the true agenda.

How is this complete obedience achieved?

- it is achieved by **vicious crimes committed together**

## Examples for the Secret Agenda / the Core of Rape

- **CIA:** needed for US National Security  
– or just a part of **a drug running cartel** / part of a secret police?
  - **Mossad:** working for Israel's good  
– or just a **tool for the Armageddonists** to fuel Israel's incineration?
  - **Military Industrial Complex:** standing for safety and progress  
– or just **instigating war and destruction?**
  - **NASA:** opening space for the human race  
– or just **worshipping the dragon and the technology of destruction?**
- 
- **The Order of the Illuminati:** an attempt to make the rule of men over men obsolete  
– or just a **banker's tool** to overthrow the monarchies?

Founded on May 1st, 1776 by Adam Weishaupt the order aspired to the most noble purposes:

“To bring justice and peace to mankind. To make the rule of men over men obsolete. To create a just and free society.”

Source: <https://en.wikipedia.org/wiki/Illuminati>

However, Weishaupt was paid for his work by one of the most **powerful bankers** of that time – so perhaps the real purpose was:

“To make the rule of the king-men over men obsolete and put a banker-god in its place.”

Source: <https://en.wikipedia.org/wiki/Illuminati>

Weishaupt even wrote about it, the very first paragraph of his book about the order has the truth hidden in plain sight:

“Dear friend: you will be abused, you will be deceived”

# 26 The New World Order

President Woodrow Wilson wrote in 1913:

“Some of the biggest men in the U.S., in the field of commerce and manufacturing, are afraid of somebody, are afraid of something.”

“They know that there is a power somewhere so organized, so subtle, so watchful, so interlocked, so complete, so pervasive, that they had better not speak above their breath when they speak in condemnation of it.”

Source: <http://www.michaeljournal.org/articles/world-government/item/a-history-of-the-new-world-order-part-i>

## The New World Order is old

- to the greedy it comes in the cloak of monetary success
- to the patriots or religious it comes in the cloak of 'being part of the chosen people'
- to the environmentalist it comes in the cloak of 'love for nature'
- to the liberals and the young it comes in the cloak of permissiveness

## But the same force is behind it:

- **the decay of our values and our culture is deliberate!**

John F. Kennedy said in 1961 in his speech "On secret societies"

“For we are opposed around the world by a monolithic and ruthless conspiracy that relies on covert means for expanding its sphere of influence –”

“ – on infiltration instead of invasion, on subversion instead of elections, on intimidation instead of free choice, on guerrillas by night instead of armies by day.”

Source: <https://www.youtube.com/watch?v=y8HTr-F-FVM>

# The New World Order is a belief system of extreme supremacists

Its global agenda is currently unfolding, it manifests itself:

- by terror attacks like 9/11 or 7/7 in London as a symptom
- by secret societies and oligarchs as a tool for power
- by a mad, hidden – but well structured agenda
- by the **worship of evil as the real [and spiritual] source of power**

## The four power levels of the New World Order

	<b>4. luciferian level: spiritual-technological doctrine / hate against the living beautiful and just</b>		
	<b>3. dark state level: profit by abuse</b> [power&perversion oriented; money printers]		
	<b>2. deep state level: deception</b> [money oriented / big corporations / war machine]		
	<b>1. state level: complete ignorance or confusion</b>

## 26 Symptoms of the disease

Sergey Lavrov, 2017: the post-Christian period of the West

“If we talk about Western and European values, which are constantly put forward as example for us, these are probably not the values the grandfathers of today’s Europeans espoused but something new and modernized, a free-for-all, I would say”

“These are values that can be called post-Christian.”

[www.mid.ru/en/foreign\\_policy/news/-/asset\\_publisher/cKNonkJE02Bw/content/id/2599609](http://www.mid.ru/en/foreign_policy/news/-/asset_publisher/cKNonkJE02Bw/content/id/2599609)

### What is this "new post-Christian" in our society?

- destruction of freedom / destruction of free choices (enslavement by interests on debt of virtual money and addiction to consumption)
- destruction of the family
- destruction of the male / female (destruction of gender identity)
- destruction of national states **including the US and Israel**
- destruction of cultural identity and humanistic education (mass immigration)
- abolition of cash money
- limitless creation of virtual money by the private banks (fiat credit money)
- absolute obedience to the ruling power elite
- terror management and terror attacks against civilians (including nuclear and chemical attacks)
- mandatory RFID chip implants in humans
- educated to become greedy / create a monetary based reward system without love
- despise of human life (e.g. embryos as objects or bred as organ donors)
- despise of god's creation
- sexual perversion / sadism
- destruction of the spiritual self identification (all religions)
- glorification of symbolic and direct violence

# 27 Time and education

## 26.1 The discovery of slowness

“But time is life.  
And life resides in the human heart.”

“And the more people saved,  
the less they had.”

Source: *Michael Ende, MOMO, end of chapter 6*

## 26.2 About the education of the masses and the A-bomb

“In this lies our only security and our only hope – we believe that an informed citizenry will act for life and not death.”

**Albert Einstein (1879 – 1955); on atomic energy**

Source: [www.ratical.org/radiation/KillingOurOwn/KOO.pdf](http://www.ratical.org/radiation/KillingOurOwn/KOO.pdf)

## 26.3 About the education of the masses and liberty

“Educate and inform the whole mass of the people... They are the only sure reliance for the preservation of our liberty.”

**Thomas Jefferson (1743 – 1826, American President)**

Source: <https://www.brainyquote.com/quotes/quotes/t/thomasjeff135368.html>

## 26.4 Knowledge is our power

As monstrous as the evaporation of three thousand people in New York was, as appalling it is to know that tens of thousands will die of cancer needlessly by treason alone, one thing above all will remain unconceivable to the world:

- the stupidity of the crime

How is it that a small group of neo-fascist zionist criminals is able to take the entire world hostage?

- it is by **our consent**, based on disinformation

These crimes will not stop, as long as the creation of money resides in the hand of powerful criminals and their private banks.

However, if we – as a people – stop to cooperate and start to expose the system it will crumble by itself.

On a **personal level** we can simply try to resist the agenda:

- to defend our freedoms
- to hold our family in high esteem
- to prevent indoctrination of false gender identity
- to defend our national state and our culture
- to use cash money or other means of exchange
- to refuse the RFID chip implants agenda
- to laugh at the ruling power elite, to make them afraid of us, by the knowledge we hold
- to take life as something sacred – and to know our spiritual self

So let me finish my presentation with the words I used at the beginning.

We are in this together. Truth, justice and peace are the only option. For all of us.

To disarm the devil – and not to serve him.

# 27 Questions & Answers

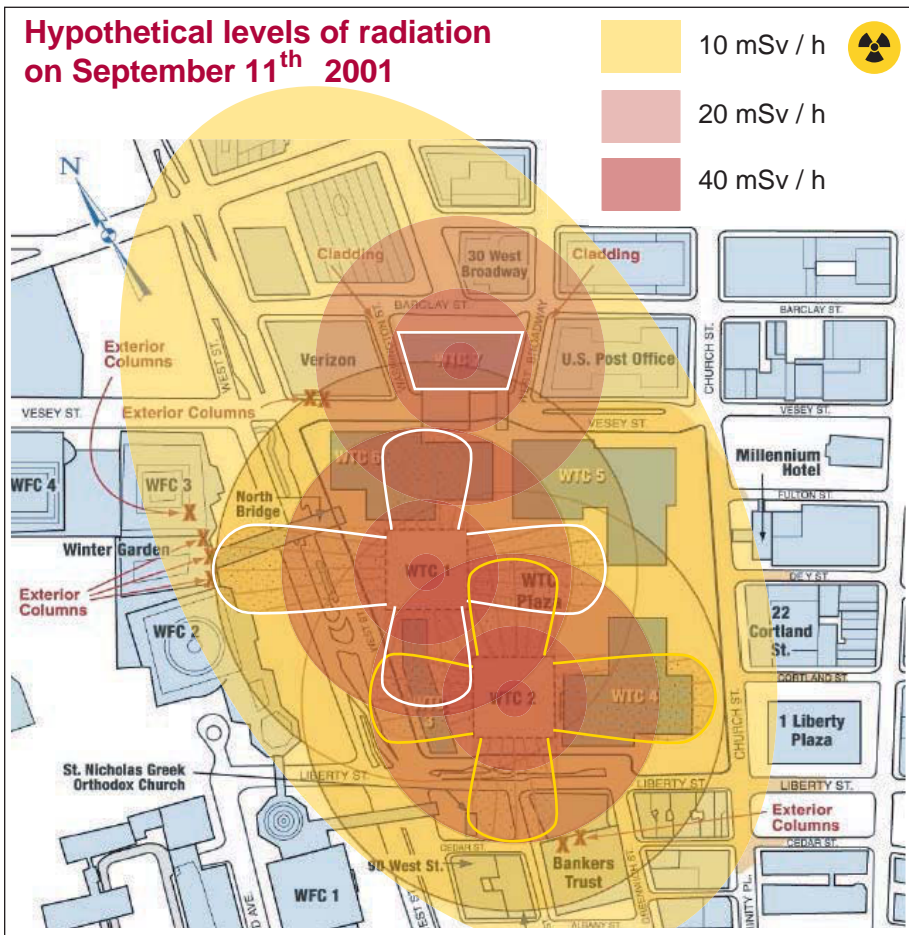

## Q1: how did they control radioactivity?

The chosen tactics was: "controlling the controllers". Over 4,000 first responders and policemen were equipped with small detectors:

- any sort of alarm would have been under the system's control

In addition, radioactivity levels outside the WTC area were most likely quite low because of:

- a minimized primary (fission device for ignition)
- absorption of the radioactivity in the pit (the rockbed below)

Source (modified): <http://911research.wtc7.net/wtc/analysis/collapses/mushrooming.html>

## Q2: to what extent Israel is responsible?

Even if Israel [or the neocon-fascist Zionist supremacists behind it] can be regarded as the driving force, part of the responsibility lies certainly also in the "western power structure".

There was too much conformity, too much collaboration, too much profit in the West and for the "western elite".

I would call it a joint venture operation, a fifty-fifty business of the bankster cult and the military-industrial complex.

### Benjamin Netanyahu interview, NBC, 9/13/2001

"I said if we don't arrest the militant [...] then the next thing that will be is not a car bomb in the World Trade Center, but a nuclear bomb"

**Benjamin Netanyahu**

Source @ 00:27: <https://www.youtube.com/watch?v=GAhtATuljPM>

He continues:

"Now, it wasn't a nuclear bomb, it was a 350 ton conventional bomb"

Indeed, the Twin Towers' shockwaves correspond to:

- a 0.35 kt primary ignition charge (exempt the slow fusion burn, which added to the yield through radiation)

## Q3: what kind of tests have been made?

Already old [declassified] military film show systematic testing:

- steel structures, bridges, buildings were exposed to nuclear blasts (from below and above ground)

### Nuclear Test: "Operation Upshot-Knothole" (1953)

Source @ 09:55: <https://www.youtube.com/watch?v=r9UwBOhyJSI>

#### Q4: how could people survive the blast inside the Tower?

A small group of people survived the blast, being trapped on the fourth floor inside the North Tower.

This "Miracle of Stairwell B" is often cited to refute the hypothesis of a nuclear blast: they would be all dead.

Source: <https://www.google.com/maps/@40.7091124,-74.0100864,16z>

However, if these people were never exposed to the nuclear blast, the picture changes completely.

The required eruption channel for the nuclear plasma must have a size of only approx. 12 m x 12 m:

- equivalent to the size of the central cavity of the "Memorial Pools"

This is like standing next to a machine gun, firing up:

- if you are standing a few meters aside from it, you go unharmed

## Q5.1: what temperature was reached inside the Towers?

Temperatures well over 1,000,000 °C are achieved in the centre of a nuclear burn.

However, these extreme conditions are limited to the tiny space where the nuclear burn takes place.

- the nuclear plasma exits the rockbed with only 8,000 °C
- the upshot is very focused and limited to the building's core
- the pressure wave is also directed upwards, as if exiting a nozzle

Source (modified): <https://wikispooks.com/wiki/File:SkyScrapersScheme.jpg>

## Q5.2: are the findings of ae911truth.org invalidated?

The findings of the group 'Architects&Engineers for 9/11 truth' are still valid in respect to the key evidence, but missing are at least:

- calculation of the overall energy involved [terajoules]
- interpretation of the momentum of the entire process (indicating one single source of energy – the rising and falling wave)

### Valid key evidence – collected by ae911truth

- numerous accounts of pre-collapse explosions
- rapid onset of destruction
- acceleration through what should have been the path of greatest resistance
- isolated explosive ejections 20 to 60 stories below the “crush zone”
- lateral ejection of multi-ton steel framing members distances of 200 m
- mid-air pulverization of 90,000 tons of concrete
- large volumes of expanding pyroclastic-like dust clouds
- total destruction and dismemberment of all three buildings
- several tons of molten steel/iron found in the debris piles
- evidence of thermite incendiaries on steel beams / diagonal cuts
- nanothermite composites and iron microspheres found in WTC dust samples

### Q5.3: how was the melt out of the buildings achieved?

As the presence of the incendiary thermite was confirmed in the dust samples, the pre-collapse melt out was most likely done using this sort of highly reactive substance.

However, theoretically the weakening of the inner core could also be achieved by a small research reactor (if it was already installed):

- highly critical reactors would be able to produce multiple radiation pulses

#### Example: test reactor Borax II in supercritical condition

Source: <http://www.ne.anl.gov/About/reactors/lwr3.shtml#fragment-5>

In the US, a number of reactors were run supercritically and blown up deliberately for test purposes.

After the neutron control rods had been catapulted out of the fuel elements, the whole reactor exploded as expected.

### **Example: test reactor Borax II during explosion**

Source @13:58: <https://www.youtube.com/watch?v=8WfNzJVxVz4>

William Tahil, the author of the book 'Ground Zero: the nuclear demolition of the World Trade Center', is convinced that a pulsed nuclear reactor or an enhanced radiation weapon was already built-in, in the sub-basement of each Tower.

The mindset of the perpetrators is certainly open to everything, even blowing up a nuclear reactor, by self-destruction or by triggering an additional nuclear weapon beneath it.

However, I do not believe it, simple because contamination levels would have been much higher and easily detectable.

## Q6: do the seismic shockwaves indicate a nuclear process?

Underground explosions can be easily distinguished from an earthquake, as the different waveforms are scattered in a unique pattern.

The 9/11 signal clearly indicate an underground explosion, however surprisingly small in magnitude for a nuclear weapon:

- this indicates that only part of the energy was released as a shockwave, a sort of additional slow-and-powerful radiation device was therefore involved
- alternatively, this might indicate a very poor coupling of the energy in the ground (due to damping factors)

## Q7.1: how does nuclear fission start?

The atom splits in two, if one neutron hits the tiny nucleus directly.

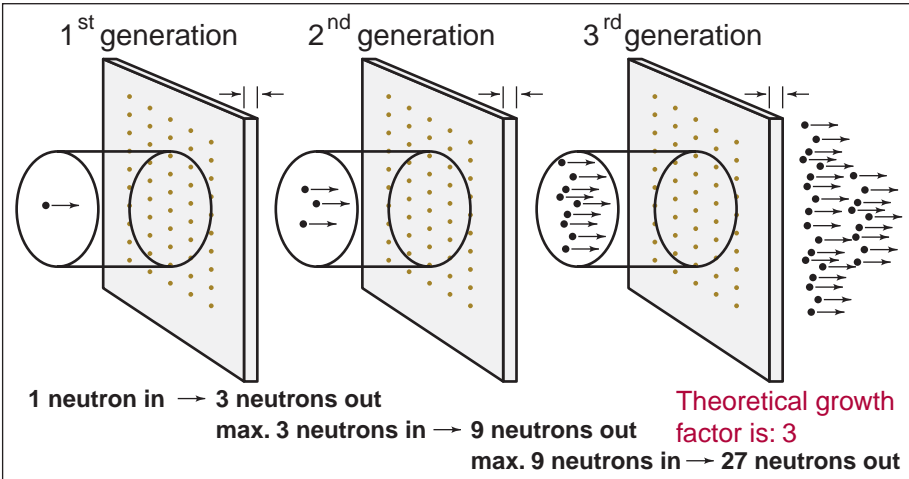

## Q7.2: how did they minimize the critical mass / the fallout?

Critical mass means first of all:

- sufficient neutrons per cross section to get most of the uranium atoms hit on the nucleus directly and simultaneously

As the nucleus is very tiny and a direct hit is unlikely, growth factor is normally much smaller than 1: the process stops

Source (modified): <http://hyperphysics.phy-astr.gsu.edu/hbase/Nuclear/crosec.html>

Only if the initial number of neutrons is already very high, the critical threshold can be passed:

- growth factor  $> 1$  leads to an explosion

The 16 kt yield atomic bomb which incinerated Hiroshima in 1945 carried 64 kg uranium-235 of which only 0.91 kg were consumed.

Critical mass of uranium-235 is:

- 50 kg, unaided
- 17 kg, with a simple 30 cm iron housing for neutron reflection

Source: [https://en.wikipedia.org/wiki/Critical\\_mass](https://en.wikipedia.org/wiki/Critical_mass)

To what degree critical mass can be reduced by using artificial neutron radiation sources, extreme compression, optimized geometry and powerful neutron reflectors is a military secret, however:

- if neutron flux could be fully targeted, theoretically 1 kt yield would require: **56 g of uranium-235**

## Q8: why did concrete blocks transform to dust at free fall?

Once the water inside the concrete crystal absorbed the radiation energy and turned to overheated steam it ripped the crystal apart:

- from that point on the concrete blocks were as brittle as a dry sand castle thrown into the air

The nuclear radiation did NOT destroy or influence the concrete blocks during free fall: destruction was already done.

## Q9: is there real proof for an additional nuclear fusion?

yes: if the yield was the output from a first generation nuclear fission device alone, radioactive contamination would have been extreme:

- although the presence of the expected elements was confirmed in the dust, no information about isotopes [and thus origin] was given

Source (modified): <http://www.nndc.bnl.gov/chart/reCenter.jsp?z=56&n=87>

In fact, elevated levels of the nuclear fusion fuel tritium  $^3\text{H}$  were found.

## Q10: how reliable are the findings of Prof. Dr. Steven Jones?

In 2006 Prof. Dr. Steven Jones published a letter, emphasizing:

- no traces of radioactivity were found [ 5 years after the event ! ]
- no extreme pulverization of the towers took place, they disintegrated mainly into small chunks

### Hard Evidence Repudiates the Hypothesis that Mini-Nukes Were Used on the WTC Towers

Letter, by Dr. Steven E. Jones

28 Sept 2006 (Updated Jan. 2007, peer-reviewed, accepted for publication 7 Jan 2007. Appendix A added 16 January 2007.)

Source: <http://www.journalof911studies.com/letters/a/Hard-Evidence-Rebudiates-the-Hypothesis-that-Mini-Nukes-were-used-on-the-wtc-towers-by-steven-jones.pdf>

Given the scope of the crime, having just one reference point and just one analysis from one professor – although with good intentions – is not what I would call "being on firm ground":

- needed are several independent teams of international experts to analyze the rockbed below the Memorial Pools

"As we examined the WTC-debris sample, we found large chunks of concrete (irregular in shape and size, one was approximately 5cm X 3 cm X 3cm) as well as medium-sized pieces of wall-board (with the binding paper still attached). Thus, the pulverization was in fact NOT to fine dust..." Prof. Dr. Steven Jones

## Q11: how many people died on 9/11?

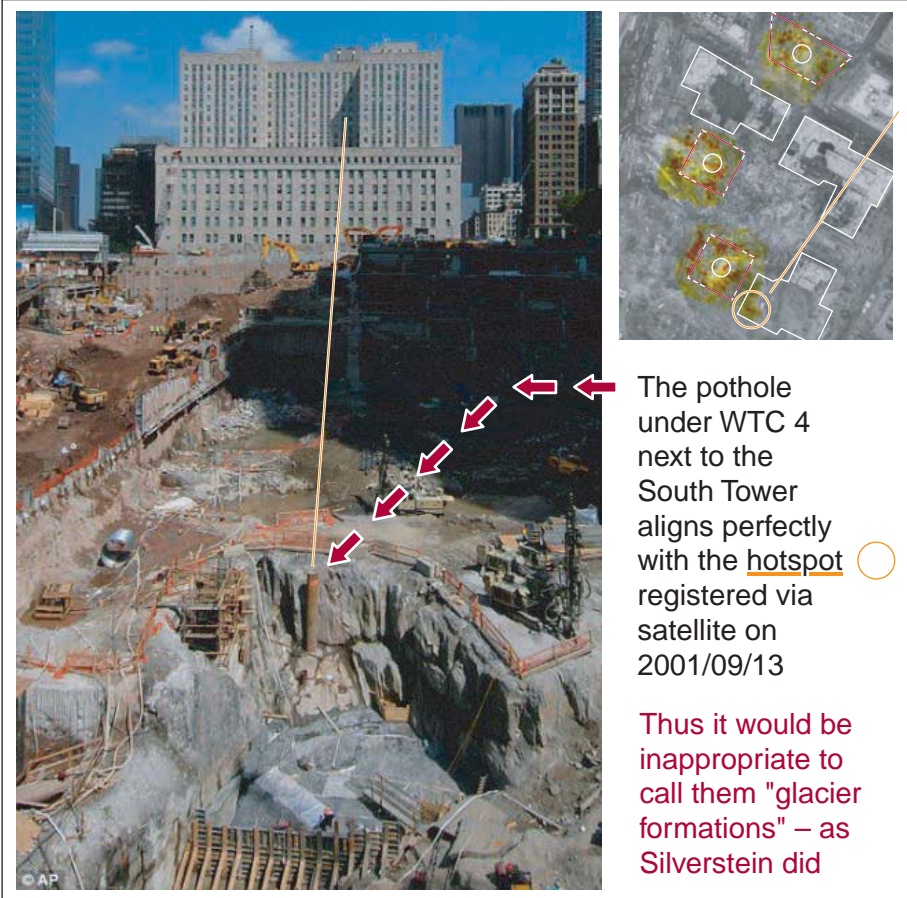

Due to the crime on 9/11 about:

- 3,000 people died instantly in the towers
- 2,000 people already died of cancer [2017]
- 5,400 people are currently sick with cancer [2017]
- millions of people were killed in the wars that followed

## Q12: how were the caverns under the WTC created?

An analysis of photos and satellite images shows clearly:

- the locations of the registered hotspots matches the location of the potholes / channels

## Q13: how were the nukes placed under the Towers?

Most likely the device was placed directly under the freight elevators as:

- the mechanical shockwave of the nuclear weapon was very small
- the secondary reflected radiation was the main source of destruction, so the weapon could be placed relatively NEAR the surface

Source: <https://jamesperloff.files.wordpress.com/2016/11/elevators-chematic.png>

- alternatively an already existing underground tunnel communication system was used to bring the device into position

## Q14: who or what controls the Secret Societies?

In the end it is irrelevant what ethnic group or sect or power structure is behind these secret organizations:

- it leads to a psychopathic, phobic and criminal mindset

I can't tell who is on the very top, but as Shakespeare put it:

“Though this be madness, yet there is method in 't.”

### The need for perpetual war

There is a distinguishable method in instigating our wars, and currently all leads to a war between Israel and the Muslim world.

The destruction of Israel is not in the interest of the neocon-fascist zionist supremacists – and yet: the method applied leads to it.

Most likely the zionist are simply played by other powers, name them Armageddonists, Luciferians, Freemasons – or Sheitan.

### The need for idolism and glorification

Remarkably, there seems to exist a constant need for portraying and idolizing a set of symbols, namely:

- the One Eye / the Serpent's Eye
- the Masonic Pyramid
- the Globalists' Star with the Pentagram

The One Eye is constantly repeated as a 9/11 symbol in NewYork

This addiction to symbolism leads to a philosophical question:

- does the devil exist as a real and spiritual entity?
- or – does the human being create this evil just by believing in it?

### Completion of the train station Oculus: above and below ground

In any case we can identify a very small group of people involved:

- worshipping an evil deity through symbolism and action

How they could achieve this power is now in the open:

- through control of the monetary system

For what reason these powerful people turned to a self-destructive spiritual philosophy remains unknown.

## 27 A story from Stansted Airport

I arrived well in time, 2 h 15 min before my plane's departure.

Passing directly to the security proceedings I lined up, together with the crowd, getting to the appointed section.

The played music was unpleasant during these first minutes: loud, penetrating, annoying.

The stupid proceedings went on as usual: the to-be passengers walking in socks through the detector gate, causing the normal congestion while taking the shoes back on.

One sad, detestable and disgusting picture I remember, if one makes the correct connection: a boy, about five years old, trying to hold his arms up.

Standing inside the full body scanner box the boy just didn't get it right. The officer wasn't pleased with the result, not unfriendly – but insisting.

So, "hands up" it was, right behind the neck: a would-be Pulitzer prize picture if it was shot in the right angle, making the connection to the historic photograph – the terrified jewish boy holding his hands up and the SS officer with his rifle in the background.

No joke to me, however the boy only feeling awkward, the parents smiling.

I had luck: I passed the detector gate without triggering a signal. Would I have refused to enter the body scanner? I doubt me, but angry I was.

I was less lucky with my hand-luggage, as expected: it got sorted out. Much too much electronics inside, the micro, the speakers and all my special presentation equipment.

When my hand-luggage arrived for second inspection, I did not expect something unusual: friendly words and an additional routine check, as it was before in Germany.

I opened the hand-luggage and knew I was in trouble: right on top it was: Jim Fetzer's and Nick Kollerstrom's fatal book:

- **America Nuked on 9/11**

Compliments of the CIA, the  
Neocons in the DoD  
& the Mossad

**America  
Nuked on  
9 / 11**

by Jim Fetzer

The lady stiffened, staring at the book in disbelief. Touching it as if it was an object with some dark power.

Turning the book round, back and forward, reading the title several times, as if it could change before her eyes.

Then she called the armed airport security by phone.

Being now a "security issue" with two polite armed guards standing by, I was questioned by the lady: my outgoing flight, my purpose of my visit to London.

Then she asked:

- whom do you work for?  
– I replied that I was self-employed.

To my surprise, she barked back:

- can you prove it?

This was unexpected.

I could not prove my status and my money sources, I was interested in getting on my flight.

I understand now: she was specially trained. Clearly trained to look for these keywords. 9/11. Or Nukes. Or Jews. Or Israel. Or Mossad. Or Osama bin Laden.

One key-word already would have guaranteed me a special treatment.

But Jim Fetzer's book provided them ALL: it was too much for the lady. Nervous she was.

The guards flipped through my printout-papers listlessly.

Finally they decided to inform the airport intelligence.

Meanwhile I had to empty the entire hand-luggage, the lady seemed eager to slit it open, searching for hidden pockets, which could hold the "razor blades".

An additional test of explosives took place, wiping my suitcase with a sort of small tissue, which was then put into the machine for molecular trace-analysis.

I braced myself to miss my plane, as being much likely, as we were waiting for the intelligence to arrive, ten minutes or so.

As I didn't carry anything more dangerous than a book, the two arriving intelligence officers sent the armed guards away, inviting me to a personal talk, "just to know more about you on a personal level".

No unfriendly words.

And so I found myself in a small, windowless interrogation chamber, only a few meters away from the original checkpoint.

They were polite enough to check my departure-time and my plane, indicating they were not interested in holding me too long.

And so I had the pleasure to pass about 30 minutes or so in the room for special guests, giving my second lecture on the 9/11 topic to the intelligence officers.

And yes, they took notes, handwritten.

- where did the meeting take place?
  - I showed the Diorama address, clearly visible on my printouts:  
nothing to hide
- whom were you talking to?
  - I showed the 911keptalking printouts, addresses written down
- did they ask you to present this topic?
  - I denied, it was me who applied to 911keptalking
- why did you engage?
  - I replied, I felt it was my civic duty

- what was the audience's reaction?

- I wanted to describe it as:

- # highly interested

- # surprised

- # thankful on a personal level

- # generous

... but I was interrupted by the next question, crossfiring.

- who did contact you?

- I repeated, I contacted 911keep talking myself

- why do they write you were a nuclear physicist, how much 'nuclear'?

- I replied, the title was chosen as it certainly sounds good, pointing out that my job was in the field of technical documentation, not in the nuclear weapon industry

They agreed, smiling on the joke.

- are you employed?

- I repeated [again, and at this point wondering how important the money issue was for the security], that I was self-employed, having different customers

Should an employed person be afraid in naming his employer?

Afraid of losing his job? Getting into trouble because of a free lecture?

I can't guess.

- where do you live?

- I showed my papers, writing my home address down for them

- do you own a mobile phone?

- I denied, I could not give a number, carrying only my wife's mobile phone for this trip

- why don't you have mobile phone of your own, are you afraid to be wiretapped?
  - I replied, I would not exclude it – but living without a mobile was a convenient lifestyle anyway
- are you a religious person?
  - I denied
- spiritual?
  - I replied, I would accept this term, without insisting or further specification
- do you earn money by your 9/11 talks?
  - I denied, it was a ruinous business
- why do you have so many russian visas in your passport?
  - I replied, my wife was Russian

At this moment the situation changed. I dropped out for them, becoming an object. The conversation was no conversation any more, but a discussion between the two.

The younger officer suggested twice taking copies of all russian visas.

The elder officer in charge dropped it:

" – ... "his" wife is russian, and so: no need for investigating this."

Then I dropped in again: the unequal "conversation" continued between us three:

- did you go to New York after the attacks?
  - I denied, I was in New York only two years before the event
- so you never saw the museum?
  - I confirmed, for me the official site [911memorial.org](http://911memorial.org) was a scandal, causing me to create the website [911memorial4kids.org](http://911memorial4kids.org)

The younger officer engaged, most likely sincerely:

"I saw it. I was there, it is the documentation of a crime.

I was on firm ground, relaxing.

Replying there are many theories outside, Richard Gage, the Russian serviceman Dimitri Khalezov, Dr. Judy Wood and the engineer William Tahil.

Around these four centres of gravity the belief system of the different groups was rotating in a space of ignorance.

The officer in lead gave me credit, he agreed. We also noted that Dr. Judy Wood's theory is a bit far fetched.

Star wars space weapons do not exist, yet.

- so how was it done, in your opinion?
  - I mentioned the possibility of containing a nuclear blast in the rockbed, the guided neutron flash from below and the following, nearly soundless eruption

Again the younger officer heated up:

"The towers were build on a landfill, I know it, I have seen it, it is documented."

"In no way the landfill could have contained the blast. I saw it in the museum".

"You might take a normal cloud for a mushroom cloud – if seen from below and in your own imagination, as a misinterpretation of some pictures."

I apologized, not excluding mistakes from my part. Trying to resist the temptation of holding a lecture with the material I had on the laptop.

Time was passing by. My plane would not wait.

- do you think the government is controlled by non-legal powers?
  - I replied I would not exclude it, as big corporations and banks hold the real power
  
- your papers mention 7/7, was this part of your talk?
  - I replied, that 7/7 was not my topic, but one comes across it when analyzing 9/11
  
- do you think that the government did 7/7?
  - I replied it would fit the picture

Once again the situation changed. They clearly disliked my response.

9/11 did concern the US, 9/11 was far away, a joke.

As for 7/7 in Britain: they took it seriously.

- do you think we created ISIS?
  - I replied it would fit the picture
  
- what do you mean, creating it by instigating hate due to political errors – or funding it?
  - I replied we can be sure ISIS is funded by the West

Clearly in discontent the younger officer replied defiant, reproachful and nearly indignant: "This is your belief!"

The older officer in charge calmed him down: "no need to get angry. "He" is free to speak."

"He" – that's me. We returned to 9/11. Politely.

- is this all YOUR own material?
  - I showed what was given to me by the audience. Including the red book from the "Ministry of Peace":  
9-11 – THE ISRAELI LINKS (which they did not like)
- what is your website?
  - I wrote down the [www.911history.de](http://www.911history.de) – nothing to hide
- do you think there is a global agenda behind it all?

Suddenly I felt being in the position of the questioner, asking with a smile: "certainly you have already heard of the New World Order?"

The younger officer replied with a snap: "certainly we have!"  
Great answer to me. They all know.

- do you consider yourself a conscious person?
  - I answered: hopefully – to a certain degree

One could start musing about this, after reading much about the 'awakening of the spirit'.

Strange. They all know.

I was released in time, missing only lunch, not my plane.

# 28 HOPE not hate

Strictly within the New World Order logic of turning everything upside down – and to distort the meaning of words – 'HOPE not hate' does not mean hope.

The next meeting of the '911Keep Talking group' could not take place, as 'HOPE not hate' – a UK based lobby group – prevented the event.

- generally speaking under attack is: **free speech**

If an organization "campaigns to counter racism and fascism" it should at least stop serving the fascists' interests.

<b>obscure</b>	Keep Talking, run by Ian Fantom, is an obscure London based group for conspiracy theorists of all types ranging from Holocaust deniers, climate change deniers and 9/11 'Truthers'. Past guests include Piers Corbyn, brother of Jeremy, who claimed man made climate change is a 'lie'.	<b>'lie'</b>

<b>'false flag'</b>	Kollerstrom has called the 9/11 attack in New York, 'a constructed, fabricated event' and argues that the 7/7 attacks in London were a 'false flag' terror attack. Tonight, he will be giving his conspiratorial take on the recent Westminster attacks in London.	<b>deniers</b>

## 29 Epilogue

Engaging in 9/11 means to uncover, layer by layer, the incredible story of a web of lies, so thick, so impenetrable, so vast, so atrocious, that people simply refuse to believe the web exists.

Each layer of deceit holds its own logic and plot, uncovering it needs courage and conviction, pertinence and spiritual power.

As many dead alleys lie on the way its easy to get lost, to become a victim in the devil's game, turning from the path of truth to the path of the perceived truth.

This false narrative, the perceived truth, is the devil's trap.

It is constantly laid out before us, constantly changed and adapted, constantly refined.

It is easy to become just a tool in the hands of the devil, who yearns for war, violence and vengeance.

There is just one way out: the continuous **and personal** search for truth, justice and peace, which is the only option.

For all of us.

To disarm the devil – and not to serve him.
